

**First Problem of the Week, due Thursday 02/15**

Max asked his five friends how many of them had studied for the Mathematics exam. Alex said none. Gabby said only one. Sunya said exactly two. Mark said exactly three and April said exactly four.

Max knows that those who did not study are telling lies, and that those who studied are telling the truth. How many of Max's friends studied for the exam?

(a) 0

(b) 1

(c) 2

(d) 3

(e) 4
